CB-26P Fitting position

Vauxhall Corsa 1.2 SXi

Simon had this Vauxhall Corsa 2002 Model 1.2 16V SXi - he told us:

"I am very happy with my Ecotek valve, The car pulls much better in each gear and once broken in I found an improvement in fuel economy.

I would recommend one to anyone. The valve works really well with the other modifications to the car (Piper X induction kit & SS Back box)"

Simon has used some transparent hose to sleeve over the existing hose - when you do this be sure that the hose cannot compress with the vacuum and thus close the airway.

A short length of 10mm fuel/emission hose is fine - vacuum hose is best if you can get it, this and a couple of 14mm jubilee clips and job jobbed!
